

Ray Moran
Sr. Electronics Engineer

Ray brings over 30 years of industrial robotics and electronics experience to his work at SurClean. Holding a degree in electrical engineering, Ray's expertise extends from software architecture to mechanical design and documentation.

At SurClean, Ray works closely with Alexandr and Don to create new products and improve existing designs. Ray creates innovative robotic processes and works to hone the real time control systems that allow us to alter the laser beam for safety and maximum efficiency.

A Michigan native, Ray enjoys designing and fabricating various product details and robot teach tools on his 3D printer.
